

Transition from Child to Adult Health and Social Care Services in England

The Open
University

Do you have a child with Profound and Multiple Learning Disabilities (PMLD) aged between 18 and 25 years?

I am seeking participants to join my study to find out about the parent carer experience of the transition from Child to Adult Health and Social Care Services in England.

What will participants be asked to do?

Take part in an individual interview, recorded using Microsoft Teams. During the interview, I will ask about your experience as a parent carer during the transition period.
