

Do you care for a woman between 25 and 74 or a man between 60 and 74?

We would like to hear from you!

What do we want to do?

We want to help improve access to cancer screening for people with learning disabilities.

We would like to find out what makes cancer screening easier or more difficult for people with learning disabilities to do.

What are we going to do?

We will speak to carers of people with severe or profound learning disabilities about the cancer screening experiences of the person they care for. This can take place online, on the phone, or in person.

Who do we want to speak to?

Participants must care for someone old enough to be invited for screening. To be eligible, **they must care for a woman between 25 and 74, or a man between 60 and 74.**

We want to speak to carers of people who both have and have not done cancer screening.

How can I find out more?

Please contact the researcher. She can send you more information and would be happy to answer any questions you have.
